Bus Commuter Ads

Making Bus Ads
Affordable For All

With the rise in development and Business activities, large cities around the World are facing increasing challenges in public Transport system. More and more people are using public Transport system and the buses are plying through more crowded roads than ever. The Sunvis Station Guide is linked to Global Positioning Satellite (GPS) system. Therefore its offer real time information to all bus passengers, making the services more efficient and the travel information as accurate and up to the minute as possible.

The Sunvis Station Guide system comprises a rugged Navigation Computer with an Audio/Video Player unit and Route Builders Software. The Navigation Computer receives data from Global Positioning Satellites via a small antenna mounted on the roof of the bus and estimates the location of the vehicle within a range of 10 meters. Knowing the location of the bus, the Sunvis Station Guide system is programmed to provide a variety of Audio/Video outputs. As the bus approaches a stop, a "Next Stop" audio / Video message announcement is made and when the Bus leave the Stop, again an audio / Video message will be played informing the passengers about the coming Stops.

Sunvis Systems with over a decade of experience in the Software industry, now provides "Station Guide" a full functioning and proved system for Auto Announce industry application for Town Bus, City Bus, Inter City Bus, Long Route Bus, Tour Bus, Boat and Train etc.

About GPS global satellite announcer:

The GPS global satellite announcer utilizes global satellite position system (GPS), to determine the position of Bus stops. When the bus comes near a bus stop, it receives the information of the Bus stop, and it announces and or display the Bus stop name automatically. It can also warn automatically of important place or Point of Interest (POI).

On-Board Intelligent Bus Audio / Video Advertisement

Sunvis Systems, exclusive Audio / Video Ads providers of Public Transport Buses in Coimbatore and first ever in India.

The Audio / Video Advertisement plays and can work in any location or at a specified programmed location, as per your request, (for example: in front of your Shop or any your preferred locations.) On a regular basis, every time and every day, whenever the Bus passes that specified location, the GPS Technology triggers your Ad.

Apart from this, special passenger Announcement are made on every locations, like current standing Bus stop name, next nearing Bus stop name, announcement like, requesting passenger not to stand on-board, while traveling, etc. Mic also being provided to drivers for making special announcements like in foreign countries.
